

COMPLIANCE DOCUMENTATION
CARBON REDUCTION PLAN

1. Commitment to achieving Net Zero

realworld one GmbH & Co. KG is committed to achieving Net Zero emissions by 2050 for Scope 1 and Scope 2 emissions, with an ambition to extend to Scope 3 over time.

2. Baseline Emissions Footprint

Emissions	Total (tCO2e)
Scope 1	2
Scope 2	30
Scope 3	210
Total	242

Base year: 2023

3. Current Emissions Reporting

Emissions	Total (tCO2e)
Scope 1	2
Scope 2	30
Scope 3	210
Total	242

Reporting year: 2024

4. Emissions Calculation Methodology

a. Scope 1 Emissions (2 tCO2e)

Scope 1 emissions relate to direct emissions from owned or controlled sources. In our case, these arise from the use of one hybrid company vehicle, which uses fossil fuel for part of its operation. The remaining company vehicles are fully electric and therefore do not generate direct (Scope 1) emissions.

b. Scope 2 Emissions (30 tCO2e)

Scope 2 emissions include indirect emissions from purchased energy. This covers electricity consumption for office operations, district heating used in our facilities, and electricity used to charge company electric vehicles. Scope 2 emissions are calculated using the location-based method.

c. Scope 3 Emissions (210 tCO₂e)

Scope 3 emissions include indirect emissions across our value chain. The most relevant categories for our business are purchased goods and services (including cloud infrastructure and external services), business travel, and employee commuting. As a software-focused company, these categories represent the majority of our emissions footprint.

d. Summary

The distribution of emissions reflects a typical profile for a digital business, with low direct emissions, moderate energy-related emissions, and the majority of emissions arising from indirect activities. These figures are based on reasonable estimates and will be refined over time as more detailed data becomes available.

5. Carbon Reduction Projects

- Increased use of remote working to reduce commuting emissions
- Reduction of business travel and preference for virtual meetings
- Energy efficiency improvements in office operations
- Procurement of low-carbon services and suppliers

6. Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

This Carbon Reduction Plan has been reviewed and signed off by the management of realworld one GmbH & Co. KG.
